

Software Update for the Motorola DEFY™ 2.51.1

Introduction

This is a software update for Motorola DEFY users who are currently using software versions 2.21.0 or 2.22.0. This new software package will update Motorola DEFY phones to software version 2.51.1 and will provide several improvements to device performance.

For optimal performance, we encourage you to download and install this latest software update. For more information on your Motorola DEFY, visit us at

www.motorola.com/mydefy

Who Can Use This Release

Only Motorola DEFY™ users.

Highlights

After downloading and installing the software update, you will notice:

Phone and Call Stability	Improved stability, resulting in fewer occurrences of unresponsiveness and/or programs closing unexpectedly
Updated Google Android Applications	This enhancement provides an updated version of Google Mobile Services apps
Improved Phone Performance	Performance improvements for touch screen, proximity sensor, and the ambient light sensor
Improved Security	This enhancement contains new Google security patches

Instructions for Installing Software

For a successful installation, we recommend installing this update while the battery in your phone is at least 50% charged. Make sure you have an active SIM card installed in your phone.

Using your Windows based PC Motorola Software Update (MSU)

1. Go to www.motorola.com/update for instructions on how to download the software update.

If you have difficulty with this update, visit us at www.motorola.com/mydefy

There is no charge for this update, other than your usual data connection costs.

Additional Information

Certain features, services and applications are network dependent and may not be available in all areas; additional terms, conditions and/or charges may apply. Specific functionality and features with each software version of Android may vary. Contact your service provider for details.
